TINUBU SURETY SOLUTION FOR BROKERS AND AGENTS

Nine of the top 10 brokers use Tinubu

Solving Surety's Biggest Challenges

As the Surety market grows, brokers and agents face increasing pressure to process bonds quickly and accurately. Manual workflows, limited real-time data, and disconnected systems create complexity and inefficiencies that slow bond processing and hinder client service. Tinubu addresses these challenges headon with a cloud-based platform that streamlines workflows, reduces manual effort, and connects all stakeholders in real-time.

Industry Challenges

The platform is so easy to use.

Love the bond form library and

the billing integration to Epic.

The Tinubu All-In-One System:

Quick Bond Processing

Issue bonds in minutes through Tinubu's online Customer portal, with instant alerts for submissions, approvals, and updates

Bond Form Library

Access over 30,000 bond forms, constantly updated with obligee requirements.

Carrier Integrations

Reduce bond filing delays by digitizing the reporting process, including bond data, real-time bond validation, and invoicing and billing.

Electronic Bonding

Connect with hundreds of obligees—including 70+ Departments of Transportation —and integrate seamlessly with BidExpress.

Simple Bid Results Management

Track and report bid results, rankings, amounts, and competitor data—all in one place for greater visibility.

Real-Time Alerts

Receive instant email alerts when bond requests are submitted, approved, or updated.

On-Demand Access

Instantly view bond status, amounts, premiums, job details, and documents.

Advanced Integrations

Connect with existing tools using robust APIs, including agency management systems like Epic and Sagitta.

Bond Renewal Tracking

Monitor all bond renewals on a single page, complete with liability data and automated reminders.
