

# TINUBU SURETY SOLUTION FOR CARRIERS

tinubu

A proven Surety solution with 20+ years of industry experience, 2 million+ bonds, and \$2.5 billion in premium.

## Surety is complex. Let's simplify.

In a rapidly evolving risk landscape, the Surety market thrives. While uncertainty challenges other insurance lines, the Surety industry is growing steadily—surpassing \$20 billion\* and drawing attention from multi-line carriers and MGAs.

Yet managing Surety bonds remains uniquely complex. Unlike standard P&C products, Surety workflows involve manual processes, data silos, and approval delays. That's where Tinubu comes in—streamlining operations and unlocking efficiency.

## We help carriers turn these challenges into opportunities

 66% automation improvement	Modernize operations with configurable workflows in a scalable system
 50% savings vs in-house builds.	Lower IT costs and lessen internal IT burden
 < 100 days to market entry	Leverage our expertise and technology to launch quickly
 90% agent user-friendly rating	Give agents a user-friendly experience that drives growth

## The Tinubu all-in-one system:

- **Automate Workflows with the Underwriter's Workbench**  
Accelerate underwriting with real-time risk assessments, configurable rules, and automated decisions.
- **Configurable and Customizable**  
Tailor workflows, forms, and templates to match your processes. Automate manual tasks to boost efficiency and reduce errors.
- **Real-Time Insights**  
Track performance, compliance, and financials with dynamic dashboards – export data to your reporting systems when preferred.
- **Agent Portals & Distribution Support**  
Simplify bond execution and management with automation and collaboration between obligees and principals.
- **Seamless Data Exchange & Integrations**  
Integrate effortlessly with your ecosystem while maintaining secure, role-based access and detailed audit trails.
- **User Management & Platform Administration**  
Manage users, roles, and permissions with Tinubu's user management system, ensuring secure access and detailed platform activity.
- **Cloud Infrastructure and Scalability**  
Built on Microsoft Azure, Tinubu's cloud infrastructure scales with your business, ensuring performance, reliability, and uptime.
- **Security & Compliance**  
Safeguard data with enterprise-grade encryption and meet rigorous standards like SOC 2.
